

- Team: (96/100)
 - Team Name: High Five
 - Members: Henan Mu, Yuxuan Cheng, Prachi Kunjir, Sai Siddhartha Kondamu, Sai Saran Pathuri
 - Grade Components: (96/100)
 - Presentation: (76/80)
 - Organization: (47/50)
 - Technical Knowledge: (20/20)
 - Teamwork: (9/10)
 - Demo: (20/20)
 - Comments:
 - Presentation
 - Problem statement needs to be further elaborated
 - Teamwork and collaboration methods are explained well. Good “how we work together” section
 - Team discussion and planning is missing
 - Different workflows of the application are covered well
 - The team has a lot of features with corresponding implementation
 - The organization of the slides can be improved. For example, it is not clear when talking about GameManagerView, Moving Background, Moving Pacman, Collision, etc.
 - Design and implementation: clearly mentioning stage, scene, layout, controls. Using customized button and SubScene.
 - Future scope can be further elaborated.
 - The individual contribution of each team member wasn't mentioned.
 - A slide can be added for Key learnings and problems faced
 - Demo:
 - Great application, a lot of effort is put in to develop the game
 - Game looks great, cool transitions
 - The score is updated correspondingly
